

"As-Needed" Special Education Teachers

Highly Qualified special education teachers are hard to find and retain even in the largest and highest paying school districts in Arizona. Many charter schools are short staffed and ill-equipped to handle the case management and paperwork responsibilities required under IDEA. School-Psychologist.com LLC fills this void and partners with schools by providing the specialized and "as-needed" support many schools require.

For example, we have been hired to repair problems discovered by the Arizona Department of Education's compliance monitoring team. We have also assisted numerous schools prior to and through the compliance monitoring process.

In fact, we provide a full spectrum of services revolving around special education and LEA responsibilities at \$75.00/hour. Please call 602-751-1384 to discuss your special education support needs today!
